

RESISTANCE TEST SERVICES AT AG-QUEST

Herbicide-resistant weeds are an ever increasing problem in western Canada. Ag-Quest conducts resistance tests to help producers identify herbicide-resistant populations in weed SEED samples. Assays are conducted on live plants in growth rooms treated with the requested herbicide(s). Test results are derived by comparing the growth and development of tested weed samples with known resistant and susceptible weed populations. We can test major annual weeds (wild oats, green foxtail, cleavers, kochia, lamb's-quarters, redroot pigweed, shepherd's-purse, smartweed, stinkweed and wild mustard, etc.) with most post-emergent herbicides and some soil-applied herbicides. New tests are being developed as the need arises. We will NOT disclose the grower/field information without consent.

Note: Assay results are based on the sample of weed seeds sent to our lab, and the results will only reflect the herbicide resistance in that particular sample. The samples may or may not be representative of the whole field, depending on sample collecting methods. Actual response under field conditions may occasionally vary from the lab results.

Any liability for work contracted to Ag-Quest will be limited to the quoted cost for the work affected. Except for the quoted cost, any other warranty or liability of any kind and recovery of any incidental or consequential damages or claims is specifically excluded.

SEED SAMPLE REQUIREMENTS

Please ensure to collect **MATURE & DRY** weed seeds. Field should **NOT** have been sprayed with pre-harvest glyphosate. Put **DRY** seeds in paper bags or envelopes; **DO NOT** use plastic bags. Send at least 25 g (1 oz) for small-seed weeds or 50 g (2 oz) for wild oat seeds for each herbicide test. More seed will be needed for testing multiple herbicides. Please ship **DRY** samples ASAP. Samples received **before January 31** will ensure results prior to spring seeding.

***** SAMPLE SUBMISSION DEADLINE FOR SPRING RESULTS – JANUARY 31 *****

RESISTANCE ASSAY PRICES

All weeds \$ 115.00 + GST per herbicide (per test)

Prices are subject to change without notice.

Volume Discount

> 10 tests 5% discount
 > 50 tests 10% discount
 > 100 tests 15% discount

Note:

DO NOT send payment with the samples.

An invoice will accompany the test results. Please pay based on the invoice.

Make the cheque payable to Ag-Quest Holding Ltd. Include PO# _____ if needed.

*Credit cards are **NOT** accepted.*

SEED SAMPLE SUBMISSION FORM

Please complete the form (PRINT) below for every sample submitted.
